Email: tim@burchamsolutionsgroup.com

Laura Carr

Executive Director, Lexington Rescue Mission

www.lexingtonrescue.org

TOPIC:

Poverty and Homelessness

Attendees will learn about the extent of poverty and homelessness in Fayette County, some of the root causes of these problems and how they are being addressed at the local level. They will take away key action steps local leaders, businesses and residents can take to reduce the problem in our city and provide hope for our neighbors in need.

Tracy Hardin

President, Next Century Technologies

www.NextCenturyTechnologies.com

TOPICS:

MS Teams & Zoom Tips and Tricks

Both MS Teams and Zoom are great tools for communicating during the COVID-19 crisis. This is a great presentation if you are already using these tools or you are checking them out for the first time to see if they are a good fit for your organization. No technical

experience required, great for both business owners and staff.

Cyber Security Awareness Training

Get the latest scoop on scams, hacks, phishing attacks and ransomware in this presentation! Hackers are always looking for ways around your current defenses. Extorting money from ransomware victims is big money for the crime organizations that have popped up overseas. Keeping up with the latest threats will help you avoid becoming the next victim. Organizations of all sizes will benefit from this presentation. Everyone that uses a computer and has access to email should watch this. We will also cover the dark web and discuss best practices for managing your passwords.

Work-from-home

Work-from-home (WFH) is the new workplace for many companies. Challenges include finding good methods of communication between staff members, cyber security of critical data while at home, and access to the software and tools needed to keep the staff productive. The goal of my presentation is to help with all these challenges because I had to meet these same challenges with my own organization. There are several inexpensive, easy-to-use technical tools that any business owner can leverage to help with the WFH transition. This presentation is geared to the non-technical business owner and/or staff.

Shirrod Le'Det

President & Executive Coach, The Growth Coach of Greater Lexington
www.shirrodledet.com

TOPIC:

"From Now to Next" strategic mindset process for long-term sustainable growth

Shirrod speaks about taking the next step where busy owners/managers can take the time to reflect, think and plan on improving themselves and their businesses. A business is only as strong as its leadership and as successful as its strategy. My signature talk titled "From Now to Next" is a notable floor for long-term sustainable growth. However, I cover various topics, such as leadership & emotional intelligence, retention strategies, employee engagement, and communication. I aim to challenge and inspire my audience with real-life lessons ensuring measurable outcomes like:

- Leverage your leadership skills with re-imagined tools for today's business, improving your ability to connect and understand those around you building meaningful relationships.
- Create a culture that gets results and gets the hearts and minds of your team, not just their hands (stayers, not leavers).
- Implement strategies to leverage teamwork and collaboration throughout your company with straightforward honest communication through candid conversations.

Logan Nance

Consultant, CultureWise
www.culturewise.com

TOPIC:

Organizational Culture

Attendees will learn about a new and simple way to think about organizational culture. I will explain the impact than an organization's culture has on the performance of its employees and why business leaders should be systematic in their approach to culture. I will explain clearly how culture isn't soft or "touchy-feely", but is instead something actionable and very simple to understand. I will provide attendees with a playbook to better their workplaces and their lives by simply adjusting the way they think about culture.
