

May 9, 2020

We are looking forward to reopening our doors and our lanes to you soon, but please be assured that your health and safety remain our top prerogative.

While we remain closed, we are continuing to evaluate the national, state and local developments, particularly in states like ours that are re-opening. We want to assure you that we are implementing all the recommended hygiene processes and protocols to ensure that when we open, we will do so with the health of our customers and our employees as the utmost priority.

Our team has been diligently preparing for the eventual re-opening of our facility. As guidelines to open have been provided by both Federal and State officials, it has become necessary to modify our bowling center to meet the standards of social distancing, sanitation and sterilization. We are making great progress but at this time, our center will remain closed as we work towards completion of our facility modifications and the re-training of our team members.

We will continue to keep you posted on our progress towards re-opening Southland Lanes and will do so when we are confident in our ability to meet all required government standards, and ultimately provide a safe environment for all.

Once we return to normal business operations, we look forward to welcoming you and your family back when you feel it's safe to return and get "Back to Bowling" again.

Sincerely,

Danny Collins
President
Collins Bowling Centers, Inc.
