

Self-Screening

- Have you had any of the following symptoms since your last day at work or the last time you were here:
 - Cough
 - Shortness of breath
 - Fever (above 100.4)
 - Chills
 - Muscle Pain
 - Sore Throat
 - New loss of taste or smell

- Is there anyone in your household who is showing COVID-19 symptoms or who has been diagnosed with COVID-19?

- Have you been in close contact with anyone exhibiting signs or symptoms of fever, persistent cough or shortness of breath consistent with COVID-19 who has not been tested or is still awaiting testing?

- Was your temperature today above 100.4?

If you answered “Yes” to any of these questions, contact your direct supervisor and DO NOT report to work. We request that you get a COVID test immediately (available at healthcare providers including walk-in clinics) and report the results of that test to HR as soon as you receive them.

Employees diagnosed with COVID-19 may not return to work until cleared by a medical professional. They should self-isolate and follow the current guidelines.
